## Maths Calculation Strategies

## Mathematics and Numeracy

At Penclawdd Primary School, we use the White Rose Maths scheme for the teaching of Maths from Reception to Year 6, which follows the mastery approach to learning. At the heart of White Rose Maths is the belief that all children can achieve.

White Rose Maths focuses on helping all children to build a deep understanding of maths concepts and confidence in maths.

For each year group the curriculum strands are broken down into small steps that build on prior knowledge to help children develop a deep and robust understanding of the concept before moving on.

Within this booklet, you will find the calculation strategies taught and used by your child in school.
